

Since 1992 TwenTech has been a supplier of quality pre-owned production machines and test systems for the PCB assembly industry

TwenTech is a buyer and seller of screenprinters, placement machines (SMT), inserters (THT), wave soldering machines, reflow ovens and board test systems of prominent manufacturers.

Also we are able to supply equipment that is few and far between and therefore hard to find.

For questions or more info, please contact our TwenTech sales team:

### ***TwenTech is a reliable partner***

We have made a selection of proven serious suppliers all over the world with whom we are dealing. Therefore we can guarantee delivery and quality as offered.

### ***Hotlist***

Monthly you will find on our website an updated Hotlist, with a selection of interesting machines that have recently come available.

### ***Feeders, spare parts, nozzles***

Buy your feeders and nozzles for SMT assembly machines from TwenTech.

TwenTech is your source for spare parts for THT and SMT machines.

*The EU Restriction of Hazardous Substances directive (RoHS) imposes as from 1 July 2006 a restriction to the Member States of the use of certain hazardous materials in electric and electronic devices.*

### ***Lead free soldering***

TwenTech offers wave soldering machines modified for leadfree soldering. Machines already in operation can be modified as well, at minimum down time and costs.

For nitrogen supply TwenTech has the compact TITANINERT nitrogen generator. The advantage of this modular nitrogen system is that it can be placed directly within your manufacturing facility without the necessity of additional constructions and permits. Furthermore, this system is cheap and easy to maintain.
